White grease foodstuff contact 500 ML

Very pure product that has excellent anti-wear, anti-rust and anti-corrosion properties (active product with food contact quality).

It can be used between - 20°C to + 160°C and has very good adhesion to metals, penetrates into all mechanical adjustments, chains, bearings, joints,...
Suitable for foodstuffs filling machines.

The grease used for the production of this aerosol meets the essential requirements to avoid chemical or organoleptic contamination of foodstuffs with undesirable substances.

This white grease in aerosol form facilitates use considering that the propellant is quickly eliminated after spraying.

The used active material is made from Codex oil and thickener allowed by the FDA (Food and Drug Admini – USDA) in the manufacture of food products. It offers all the guarantees in the event of accidental contact with food.

PACKAGING

Tin plate aerosol : 65 mm diameter / 195 mm height
