

## SAFETY DATA SHEET

Name of product : PHARMA 19

TOTAL S.p.A

### SECTION 1 IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY / UNDERTAKING

VERSION N° 3 OF : 01st JUNE 2015

#### 1.1 PRODUCT IDENTIFIER

PRODUCT NAME : PHARMA 19

REACH N° : 01-2119487078-27

#### 1.2 RELEVANT IDENTIFIED USES OF THE SUBSTANCE OR MIXTURE AND USES ADVISED AGAINST

**Intended Use :** Cosmetic, Lubricant, Pharmaceutical, Plastics, Rubber applications, subject to applicable laws and regulations

**Identified Uses :**

- Distribution of substance
- Formulation and (re)packing of substances and mixtures
- Use in Coatings - Industrial
- Lubricants - Industrial
- Metal working fluids / rolling oils - Industrial
- Use as binders and release agents - Industrial
- Functional Fluids - Industrial
- Use in Coatings - Professional
- Lubricants - Professional (Low Release)
- Lubricants - Professional (High Release)
- Metal working fluids / rolling oils - Professional
- Use as binders and release agents - Professional
- Agrochemical uses - Professional
- Use as a fuel - Professional
- Functional Fluids - Professional
- Use in Coatings - Consumer
- Lubricants - Consumer (Low Release)
- Lubricants - Consumer (High Release)
- Agrochemical uses - Consumer
- Use as a fuel - Consumer
- Functional Fluids - Consumer
- Other Consumer Uses

**Uses advised against:** This product is not recommended for any industrial, professional or consumer use other than the Identified Uses above.

#### 1.3 DETAILS OF THE SUPPLIER OF THE SAFETY DATA SHEET

TOTAL S.p.A.

20090 SEGRATE (MI)

---

**SAFETY DATA SHEET**  
**TOTAL S.p.A****Name of product : PHARMA 19****SECTION 2 HAZARDS IDENTIFICATION**  
**2.1 CLASSIFICATION OF THE SUBSTANCE OR MIXTURE**Classification according to Regulation (EC) No 1272/2008Classification : Aspiration toxicant: Category 1.  
H304: May be fatal if swallowed and enters airways.**2.2 LABEL ELEMENTS :****Pictograms :****Signal Word:** Danger**Hazard Statements:**

H304: May be fatal if swallowed and enters airways.

**Precautionary Statements:**

P301 + P310: IF SWALLOWED: Immediately call a POISON CENTER / doctor/ physician. P331: Do NOT induce vomiting.

P405: Store locked up.

P501: Dispose of contents and container in accordance with local regulations.

Contains : white mineral oil (petroleum )

**2.3 OTHER HAZARDS**

Physical / Chemical Hazards: No significant hazards.

Health Hazards: High-pressure injection under skin may cause serious damage. Excessive exposure may result in eye, skin, or respiratory irritation.

Environmental Hazards: No significant hazards. Material does not meet the criteria for PBT or vPvB in accordance with REACH Annex XIII.

---

**SECTION 3 COMPOSITION/INFORMATION ON INGREDIENTS****3.1 SUBSTANCE :** This material is defined as a substance UVCB

DESCRIPTION	CAS N°	EINECS N°	%	CLASSIF.GHS/CLP
White mineral oil ( petroleum) REACH N° : 01-2119487078-27	8042-47-5	232-455-8	100	Asp. Tox. 1 H304

See (M)SDS Section 16 for full text of hazard statements.

**3.2 MIXTURE :** Not applicable . This product is regulated as a substance

---

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A****SECTION 4 FIRST AID MEASURES**  
**4.1. DESCRIPTION OF FIRST AID MEASURES****EYE CONTACT :**

Check for and remove any contact lenses . Immediately flush eyes with running water for at least 5 minutes, keeping eyelids open . If irritation persists, obtain medical advice.

**SKIN CONTACT**

Remove contaminated clothing and shoes . Wash contaminated skin thoroughly with plenty of water, using soap if available. No adverse effects due to skin contact expected . If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

**INHALATION**

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

**INGESTION**

Seek immediate medical attention. Do not induce vomiting.

**4.2 MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED**

Local necrosis as evidenced by delayed onset of pain and tissue damage a few hours after injection.

**4.3 INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED**

If ingested, material may be aspirated into the lungs and cause chemical pneumonitis. Treat appropriately.

**PROTECTION OF FIRST- AIDERS :**

No action shall be taken involving any personal risk or without suitable training .

See section 11 for more detailed information on health effects and symptoms .

---

**SECTION 5 FIRE-FIGHTING MEASURES****5.1 SUITABLE EXTINGUISHING MEDIA :**

Foam, dry chemical powder, carbon dioxide. Water spray /mist may be used

**5.1.2 EXTINGUISHING MEDIA WHICH MUST NOT BE USED FOR SAFETY REASONS :** water jet , unless used by authorised people . ( Stain risk caused by combustion )

**5.2 SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE****FIRE AND EXPLOSION HAZARDS**

Combustible material , low hazard. The product can form flammable mixtures or can burn only on heating above the flash point. However , minor contamination by hydrocarbons of higher volatility may increase the hazard.

**HAZARDOUS COMBUSTION PRODUCTS**

Smoke, and carbon monoxide may be formed in the event of incomplete combustion.

**5.3 SPECIAL FIRE-FIGHTING PROCEDURES**

Water fog or spray, to cool fire-exposed surfaces (e.g. containers) and to protect personnel , should only be used by personnel trained in fire fighting.

Cut off "fuel" ; depending on circumstances, either allow the fire to burn out under controlled conditions or use foam or dry chemical powder to extinguish the fire.

Respiratory ( SCBA ) and eye protection required for fire fighting personnel exposed to fumes or smoke.

---

**SAFETY DATA SHEET**  
**TOTAL S.p.A****Name of product : PHARMA 19****SECTION 6 ACCIDENTAL RELEASE MEASURES****NOTIFICATION PROCEDURES**

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

**6.1 PERSONAL PRECAUTIONS PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES**

No action shall be taken involving any personal risk or without suitable training : Put on appropriate personal protective equipment ( gloves and protective clothing and boots ). Remove contaminated clothes as soon as possible.

**6.2 ENVIRONMENTAL PRECAUTIONS :**

Shut off source taking normal safety precautions. Prevent liquid from entering sewers, water courses or low lying areas ; advise the relevant authorities if it has, or if it contaminates soil /vegetation. Take measures to minimise the effects on ground water.

**6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP**

**SMALL SPILL :** Smaller spillage can be wiped up with paper clothes . Normal antistatic work clothes are usually adequate.

**LARGE SPILL :** Recover by skimming or pumping using explosion-proof equipment, or contain spilled liquid with booms, sand, or other suitable absorbent (sand , earth, vermiculite or diatomaceous earth) and remove mechanically into containers. full body suit of chemical resistant, antistatic material is recommended.

**6.4. REFERENCES TO OTHER SECTIONS**

See Section 8 and 13.

---

**SECTION 7 HANDLING AND STORAGE****7.1 PRECAUTIONS FOR SAFE HANDLING :**

Handle in accordance with good industrial hygiene and safety practices . Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Do not ingest ; wash hands after handling . If handled at temperatures or with high speed mechanical equipment , vapours or mists might be released and require a well -ventilated workplace . When the material is handled in bulk, an electrical spark could ignite any flammable vapors from liquids or residues that may be present.

The container choice, for example storage vessel, may effect static accumulation and dissipation. Do not store in open or unlabelled containers.

**7.2. CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES**

**MATERIALS AND COATINGS SUITABLE :** Carbon steel ,stainless steel ,polyethylene , teflon , polypropylene  
Compatibility with plastic materials can vary ; we therefore recommend that compatibility is tested prior to use .

**LOAD/UNLOAD TEMPERATURE :** Ambient ( °C : 3 minimum for pumpability )

**STORAGE TEMPERATURE :** Ambient ( °C : zero min. to 40 max . )

**STATIC ACCUMULATOR :** This material is a static accumulator

Store in accordance with local regulations . Store in original container protected from direct sunlight in a dry , cool and well-ventilated area , away from incompatible materials and food and drink .

**SPECIAL PRECAUTIONS :** Keep containers closed when not in use. Prevent small spills and leakages to avoid slip hazard. Do not eat or drink while working Empty containers may retain residue and can be dangerous. Do not pressurise, cut ,weld ,brazing , solder , drill , grind or expose such containers to heat , flame , sparks , static electricity , or other sources of ignition ; they may explode and cause injury or death .

**7.3. SPECIFIC END USES:**

Section 1 informs about identified end-uses. No industrial or sector specific guidance available.

---

**SAFETY DATA SHEET**  
**TOTAL S.p.A****Name of product : PHARMA 19****SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION****8.1. CONTROL PARAMETERS****OCCUPATIONAL EXPOSURE LIMITS**

White mineral oil (petroleum) : for oil mists and fume : 5 mg/m<sup>3</sup> ( 8 h ) OEL -TWA  
5 mg/m<sup>3</sup> - ACGIH – TLV

**DERIVED NO EFFECT LEVEL (DNEL)/DERIVED MINIMAL EFFECT LEVEL (DMEL)****Worker**

Substance Name	Dermal	Inhalation
White mineral oil (petroleum)	220 mg/kg bw/day DNEL, Chronic Exposure, Systemic Effects	160 mg/m <sup>3</sup> DNEL, Chronic Exposure, Systemic Effects

**Consumer**

Substance Name	Dermal	Inhalation	Oral
White mineral oil (petroleum)	92 mg/kg bw/day DNEL, Chronic Exposure, Systemic Effects	35 mg/m <sup>3</sup> DNEL, Chronic Exposure, Systemic Effects	40 mg/kg bw/day DNEL, Chronic Exposure, Systemic Effects

**PREDICTED NO EFFECT CONCENTRATION (PNEC)**

Substance Name	Aqua (fresh water)	Aqua (marine water)	Aqua (intermittent release)	Sewage treatment plant	Sediment	Soil	Oral (secondary poisoning)
White mineral oil (petroleum)	NA	NA	NA	NA	NA	NA	NA

**8.2 EXPOSURE CONTROLS****8.2.1ENGINEERING CONTROLS**

Personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of ventilation or other control measures and/or the necessity to use respiratory protective equipment . Reference should be made to EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for the determination of hazardous substances .

**8.2.2 PERSONAL PROTECTION****HAND PROTECTION :**

In open systems where contact is likely, wear safety goggles, chemical-resistant overalls, and chemically impervious gloves. Suitable gloves are neoprene ,nitrile or acrylonitrile -butadiene rubber or PVC.( Take notice of CEN 420/94,CEN 374/1-3/94 and CEN 388/94 )

**EYE PROTECTION :**

Wear safety goggles/safe shield if splashes may occur. No other special precautions are necessary provided skin/eye contact is avoided.

**RESPIRATORY PROTECTION :**

If the product is heated under manual handling , use suitable mask with filter A 1 P2 or A2P2 . Handling in automatic production lines, with exhaust or ventilation , will not require mask.

**SKIN AND BODYPROTECTION :**

Wear protective clothing if there is a risk of skin contact and change them frequently or when contaminated .

**HYGIENIC MEASURES :**

Act in accordance with good industrial hygiene and safety practice

**ENVIRONMENTAL CONTROLS**

See Sections 6, 7, 12, 13.

**For Summary of Risk Management Measures across all identified uses, see Annex.**

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A****SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES****9.1. INFORMATION ON BASIC PHYSICAL AND CHEMICAL PROPERTIES**

APPEARANCE / ODOUR : Clear colourless liquid , neutral odour.

ODOUR : no odour or light petroleum

pH : Not applicable

ODOUR THRESHOLD : No data available

POUR POINT ASTM D97 : - 9 °C

BOILING POINT RANGE ASTM D 86 : Data not available

FLASH POINT ASTM D 92 : 184 °C

FLAMMABLE LIMITS ( Approximate volume % in air ) : UEL : 7.0 LEL : 0.9

VAPOR PRESSURE AT 20 °C : max 0,01 kPa

VAPOUR DENSITY (air =1 ) : &gt; 2 kPa at 20 °C

RELATIVE DENSITY ASTM D 4052 AT 15 °C : Not available

SOLUBILITY IN WATER AT 20 °C : Negligible

Log Pow ( n-octanol/water partition coefficient ) : &gt; 3.5

AUTOIGNITION TEMPERATURE : no data available

DECOMPOSITION TEMPERATURE : no data available

VISCOSITY AT 20 °C ASTM D 445 cPs : 27

VISCOSITY AT 40 °C ASTM D 445 mm<sup>2</sup>/s : 15

EXPLOSIVE PROPERTIES : None

OXIDIZING PROPERTIES : None

**9.2 OTHER INFORMATION**

DENSITY AT 15 °C ASTM D 4052 kg/L : 0,84 (approx.)

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A****SECTION 10 STABILITY AND REACTIVITY**

10.1. REACTIVITY: See sub-sections below.

10.2. CHEMICAL STABILITY: Material is stable under normal conditions.

10.3. POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

10.4. CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

10.5. INCOMPATIBLE MATERIALS: Strong oxidizers

10.6. HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

---

**SECTION 11 TOXICOLOGICAL INFORMATION****11.1. INFORMATION ON TOXICOLOGICAL EFFECTS****INHALATION**

Acute Toxicity ( rat ) :4 hours LC 50 > 5000 mg/ m3 . Minimally Toxic. Test(s) equivalent or similar to OECD Guideline 403

Irritation : Elevated temperatures or mechanical action may form vapours , mists, or fumes witch may be irritating to the eyes, nose , throat and lungs. Avoid breathing vapour , mists , or fumes.

**SKIN CONTACT**

Acute Toxicity ( rabbit ) : LD 50 > 5000 mg/ m3 . Minimally toxic . Test(s) equivalent or similar to OECD Guideline 402

Skin Corrosion/Irritation (Rabbit): Negligible irritation to skin at ambient temperatures. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 404

**EYE CONTACT**

May cause mild, short-lasting discomfort to eyes . Test(s) equivalent or similar to OECD Guideline 405

**INGESTION**

Acute Toxicity ( rat ) : LD 50 > 5000 mg/ m3 . Minimally toxic . Test(s) equivalent or similar to OECD Guideline 401

May cause laxative effects when ingested.

**SENSITISATION**

Respiratory Sensitization: Not expected to be a respiratory sensitizer.

Skin Sensitization: Not expected to be a skin sensitizer. Test(s) equivalent or similar to OECD Guideline 406

ASPIRATION May be fatal if swallowed and enters airways. Based on physic-chemical properties of the material.

**CHRONIC EFFECTS**

GERM CELL MUTAGENICITY : Not expected to be a germ cell mutagen. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline Test method unavailable. 471 473 474 475 476

REPRODUCTIVE TOXICITY : Not expected to be a reproductive toxicant. Based on test data for structurally similar materials Test(s) equivalent or similar to OECD Guideline Test method unavailable. 414 415 416

LACTATION : Not expected to cause harm to breast-fed children.

**SPECIFIC TARGET ORGAN TOXICITY ( STOT )**

Single Exposure: Not expected to cause organ damage from a single exposure.

Repeated Exposure: Not expected to cause organ damage from prolonged or repeated exposure. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline Test method unavailable. 407 408 410 411 412 413 452

**11.1.13 OTHER INFORMATION**

Small amounts of liquid aspirated into the lungs during ingestion or from vomiting may cause chemical pneumonitis or pulmonary edema.

White mineral oil, low viscosity: Did not cause mutations In Vitro. High oral doses in certain strains of rats (F-344) resulted in microscopic inflammatory (microgranuloma) changes in the liver, spleen, and lymph nodes. Some evidence of liver damage was observed. These animals also had some accumulation of saturated mineral hydrocarbons in certain tissues. Similar effects were not observed to the same degree in other rodent strains or in other species.

---

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A****SECTION 12 ECOLOGICAL INFORMATION**

In the absence of specific environmental data for this product, this assessment is based on information for representative products .

12.1 ECOTOXICITY : Not expected to be harmful to aquatic organisms

12.2 PERSISTENCE AND BIODEGRADATION : This product is expected to be inherently biodegradable

12.3 BIOACCUMULATIVE POTENTIAL :

Has the potential to bioaccumulate , however metabolism or physical properties may reduce the bioconcentration or limit bioavailability .

12.4 MOBILITY IN SOIL :

Low solubility and floats and is expected to migrate from water to the land .Expected to partition to sediment and wastewater solids. Low potential to migrate through soil.

12.5 PERSISTENCE, BIOACCUMULATION AND TOXICITY FOR SUBSTANCE .:

This product is not, or does not contain, a substance that is a PBT or a vPvB.

12.6 OTHER ADVERSE EFFECTS : Spill may form a film on water surfaces causing physical damage to organisms. Oxygen transfer could also be impaired .

**ECOLOGICAL DATA****Ecotoxicity**

Test	Duration	Organism Type	Test Results
Aquatic - Acute Toxicity	96 hour(s)	Fish	LL0 100 - 10000 mg/l: data for similar materials
Aquatic - Acute Toxicity	48 hour(s)	Daphnia magna	EL0 100 mg/l: data for similar materials
Aquatic - Acute Toxicity	72 hour(s)	Pseudokirchneriella subcapitata	EL0 100 mg/l: data for similar materials
Aquatic - Chronic Toxicity	72 hour(s)	Pseudokirchneriella subcapitata	NOELR 100 mg/l: data for similar materials
Aquatic - Chronic Toxicity	21 day(s)	Daphnia magna	NOELR 10 - 1000 mg/l: data for similar materials

**Persistence, Degradability and Bioaccumulation Potential**

Media	Test Type	Duration	Test Results: Basis
Water	Ready Biodegradability	28 day(s)	Percent Degraded < 60 : similar material

**SECTION 13 DISPOSAL CONSIDERATIONS**

The generation of waste should be avoided or minimised wherever possible

Empty drums should be taken for recycling , recovery or disposal through a suitably qualified or licensed contractor .

Collect and dispose of waste product at an authorised disposal facility , in conformance with national and local regulations and in accordance with EEC Directives on the disposal of waste oil. Do not pressurise, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. they may explode and cause injury or death.

**13.1. WASTE TREATMENT METHODS**

European Waste Code : 13 02 05

Packaging Waste Code: 15 01 10

NOTE :These codes are assigned based upon the most common uses for this material and may not reflect contaminants resulting from actual use . Waste producers need to assess the actual process used when generating the waste and its contaminants in order to assign the proper waste disposal code .

This material is considered as hazardous waste pursuant to Directive 91/689 ECC , Reglm. 1357/2014 UE on hazardous waste, and subject to the provisions of that Directive unless article1(5) of that Directive applies .

**SAFETY DATA SHEET**  
**TOTAL S.p.A****Name of product : PHARMA 19****SECTION 14                    TRASPORT INFORMATION**  
**INTERNATIONAL TRANSPORT REGULATIONS**

USUAL SHIPPING CONTAINERS :

Rail cars, tank trucks, drums.

14.1 – 14.6 This product is not regulated for carriage according to ADR/RID, IMDG ,ICAO/ IATA

Marine pollutant : not

|14.7 SEA (MARPOL Convention - Annex II):

Transport in bulk according to Annex II of MARPOL and the IBC Code

Not classified according to Annex II

---

**SECTION 15                    REGULATORY INFORMATION****15.1. SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC FOR THE SUBSTANCE OR MIXTURE**

Applicable EU Directives and Regulations:

1907/2006 [... on the Registration, Evaluation, Authorization and Restriction of Chemicals ... and amendments thereto]  
98/24/EC [... on the protection of workers from the risk related to chemical agents at work ...]. Refer to Directive for details of requirements

2004/42/CE [on the limitation of emissions of volatile organic compounds due to the use of organic solvents in certain paints and varnishes and vehicle refinishing products and amending Directive 1999/13/EC.]

1272/2008 [on classification, labelling and packaging of substances and mixtures.. and amendments thereto]

The product is not subjected to Regl. 2037/2000 CE, 850/2004CE , 689/2008 CE

Refer to the relevant EU/national regulation for details of any actions or restrictions required by the above Regulation(s)/Directive(s).

**REGULATORY STATUS AND APPLICABLE LAWS AND REGULATIONS**

Complies with the following national/regional chemical inventory requirements: AICS, DSL, EINECS, KECI, TSCA, IECSC, PICCS, ENCS

**15.2 CHEMICAL SAFETY ASSESSMENT :****REACH Information:** A Chemical Safety Assessment has been carried out for the substance(s) that make up this material or for the material itself.EU Regulation n° 1907/2006 Annex XIV –List of substances subject to authorisation Substances of very high concern :  
None of the components are listed

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles : Not applicable

This product is not VOC

Italian poison data base ISS product code : PH19

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A****SECTION 16 OTHER INFORMATION****|PRODUCT TYPE / USES**

Types of uses according to relevant national or international regulations :

PRODUCTS USED IN COSMETICS and PHARMACEUTICALS as per :

European Pharmacopoeia ,USP , NF , JP , BP ,FU , USA and FDA 21 CFR 178.3620(a) and equivalent standards.

**EU REGULATIONS****CLASSIFICATION AND LABELLING ACCORDING TO REGULATION EC 1907/2006 AND REGULATION (EC) No 1272/2008**

Library of risk phrases listed in this document : H304: May be fatal if swallowed and enters airways.

**Abbreviations and acronyms :**

ATE : Acute Toxicity Estimate

DNEL : Derived No Effect Level

PNEC : Predicted No Effect Concentration

PBT : Persistente, Bioaccumulabile, Tossico

vPvB : very Persistente, very Bioaccumulabile

SVHC : Substances of Very High Concern

VOC : Composto Organico Volatile

TLV : Threshold Limit Value (American Conference of Governmental Industrial Hygienists)

UVCB : Substances of Unknown or Variable composition, Complex reaction products or Biological materials

ISS : Istituto Superiore della Sanità

LC : Lethal Concentration

LD : Lethal Dose

LL : Lethal Loading

EC : Effective Concentration

EL : Effective Loading

NOEC : No Observable Effect Concentration

NOELR : No Observable Effect Loading Rate

REFERENCES: Sources of information used in preparing this SDS included one or more of the following: results from in house or supplier toxicology studies, CONCAWE Product Dossiers, publications from other trade associations, such as the EU Hydrocarbon Solvents REACH Consortium, U.S. HPV Program Robust Summaries, the EU IUCLID Data Base, U.S. NTP publications, and other sources, as appropriate.

**|IDENTIFIED USES:**

Distribution of substance (PROC1, PROC15, PROC2, PROC3, PROC4, PROC8a, PROC8b, PROC9, SU3, SU8, SU9)

Use as an intermediate (PROC1, PROC15, PROC2, PROC3, PROC4, PROC8a, PROC8b, SU3, SU8, SU9)

Formulation and (re)packing of substances and mixtures (PROC1, PROC14, PROC15, PROC2, PROC3, PROC4, PROC5, PROC8a, PROC8b, PROC9, SU10, SU3)

Use in Coatings - Industrial (PROC1, PROC10, PROC13, PROC14, PROC15, PROC2, PROC3, PROC4, PROC5, PROC7, PROC8a, PROC8b, PROC9, SU3)

Use in Cleaning Agents - Industrial (PROC1, PROC10, PROC13, PROC2, PROC3, PROC7, PROC8a, PROC8bSU3, )

Lubricants - Industrial (PROC1, PROC10, PROC13, PROC17, PROC2, PROC3, PROC4, PROC7, PROC8a, PROC8b, PROC9, SU3)

Metal working fluids / rolling oils - Industrial (PROC1, PROC10, PROC13, PROC17, PROC2, PROC3, PROC4, PROC5, PROC7, PROC8a, PROC8b, PROC9, SU3)

Use as binders and release agents - Industrial (PROC1, PROC10, PROC13, PROC14, PROC2, PROC3, PROC4, PROC6, PROC7, PROC8a, PROC8b, SU3)

Functional Fluids - Industrial (PROC1, PROC2, PROC3, PROC4, PROC8a, PROC8b, PROC9, SU3)

Use in laboratories - Industrial (PROC15, SU3)

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A****16. OTHER INFORMATION**

**REVISION SUMMARY**

DATE OF PREVIOUS ISSUE : 21/07/2014

VERSION : 3

SECTION MODIFIED : Section 1 CAV phone numbers modified ; Section 2 ( change Precautionary Statements: P301+P310), Section 2 and 3 removed Directive 67/548 CE and 1999/45 CE ; Section 8.1 (professional exposure limits ), Section 13 (Packaging Waste Code), Section 16.identified uses and Annex exposure scenarios

This MSDS cancels and replaces any preceding release .

In those sections , vertical bars will indicate in the margin the text that has been changed . If a section is listed , but does not show a vertical bar , it indicates that text has been removed .

**SOURCE OF KEY DATA**

The recommendations presented in this Material Safety Data Sheet were compiled from actual test data (when available), comparison with similar products , component information from suppliers and from recognised codes of good practice.

The information and recommendations contained herein are accurate and reliable as of the date issued , but are offered without guarantee or warranty. They relate to the specific material designated and may not be valid for such material used in combination with any other materials or in any process.

Conditions of use of the material are under the control of the user ; therefore , it is the user's responsibility to satisfy himself as to the suitability and completeness of such information for his own particular use.

**SAFETY DATA SHEET**  
**TOTALS.p.A****Name of product : PHARMA 19****16. OTHER INFORMATION**

Safety Data Sheet updated in accordance with the provisions of REACH Annex II (EU No 453/2010) and Reglm. 2015/830 UE .

**Drum and small package filling PROC9**

No other specific measures identified.

**Equipment cleaning and maintenance PROC8a**

Drain down system prior to equipment break-in or maintenance.

**Storage PROC1**

Store substance within a closed system.

**Storage PROC2**

Store substance within a closed system.

## SAFETY DATA SHEET

Name of product : PHARMA 19

TOTAL S.p.A

Section 2.2 Control of environmental exposure
<b>Product characteristics</b>
Predominantly hydrophobic. Substance is complex UVCB.
<b>Duration, frequency and amount</b>
Annual site tonnage (tonnes/year): 49 tons/yr Continuous release. Emission Days (days/year): 20 days/yr Fraction of EU tonnage used in region: 0.1 Fraction of Regional tonnage used Locally: 1 Maximum daily site tonnage (kg/d): 2400 kg / day Regional use tonnage (tonnes/year): 24000 tons/yr
<b>Environmental factors not influenced by risk management</b>
Local freshwater dilution factor [EF1] 10 Local marine water dilution factor: [EF2] 100
<b>Other given operational conditions affecting environmental exposure</b>
Release fraction to air from process (initial release prior to RMM): 0.0001 Release fraction to soil from process (initial release prior to RMM): 1e-005 Release fraction to wastewater from process (initial release prior to RMM): 0
<b>Technical conditions and measures at process level (source) to prevent release</b>
Common practices vary across sites thus conservative process release estimates used.
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>
If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of $\geq 0$ % No secondary wastewater treatment required. Risk from environmental exposure is driven by Treat air emissions to provide a typical removal (or abatement?) efficiency of: 90 % Treat onsite wastewater (prior to receiving water discharge) to provide the required removal (or abatement) efficiency of $\geq 0$ %
<b>Organisation measures to prevent/limit release from site</b>
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.
<b>Conditions and measures related to municipal sewage treatment plant</b>
Assumed domestic sewage treatment plant effluent flow is:[STP5] 2000 m3/day Estimated substance removal from wastewater via domestic sewage treatment is: 96.6 % Not applicable as there is no release to wastewater. The maximum allowable site tonnage (MSafe) based on domestic sewage plant effluent release is: 89000 kg / day Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs is: 96.6 %
<b>Conditions and measures related to external treatment of waste for disposal</b>
External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3]
<b>Conditions and measures related to external recovery of waste</b>
External recovery and recycling of waste should comply with applicable local and/or national regulations [ERW1]
Section 3 Exposure Estimation
<b>3.1. Health</b>
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated [G21]
<b>3.2. Environment</b>
The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.[EE2]
Section 4 Guidance to check compliance with the Exposure Scenario
<b>4.1. Health</b>
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. [G32] Available hazard data do not support the need for a DNEL to be established for other health effects.[G36] Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. [G22] Risk Management Measures are based on qualitative risk characterisation. [G37] Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.[G23]

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A****4.2. Environment**

Further details on scaling and control technologies are provided in factsheet

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Section 2 Operational conditions and risk management measures	
Section 2.1 Control of worker exposure	
<b>Product Characteristic</b>	
Liquid	
<b>Duration, frequency and amount</b>	
Covers daily exposures up to 8 hours (unless stated differently)[G2]	
Covers percentage substance in the product up to 100 %[G13 ]	
<b>Other given operational conditions affecting workers exposure</b>	
Assumes a good basic standard of occupational hygiene is implemented [G1]	
Operation is carried out at elevated temperature (>20 C above ambient temperature)[OC7]	
Contributing Scenarios/Specific Risk Management Measures and Operating Conditions (only required controls to demonstrate safe use listed)	
<b>General exposures (closed systems) PROC1</b> No other specific measures identified.	
<b>General exposures (closed systems) PROC2</b> No other specific measures identified.	
<b>General exposures (closed systems) PROC3</b> No other specific measures identified.	
<b>General exposures (open systems) PROC4</b> No other specific measures identified.	
<b>Bulk transfers Dedicated facility PROC8b</b> No other specific measures identified.	
<b>Filling / preparation of equipment from drums or containers Non-dedicated facility PROC8a</b> No other specific measures identified.	
<b>Initial factory fill of equipment PROC9</b> No other specific measures identified.	
<b>Operation and lubrication of high energy open equipment PROC17</b> Provide extract ventilation to points where emissions occur.	
<b>Manual Rolling, Brushing PROC10</b> No other specific measures identified.	
<b>Treatment by dipping and pouring PROC13</b> No other specific measures identified.	
<b>Spraying PROC7</b> Minimise exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings.	
<b>Maintenance (of larger plant items) and machine set up Dedicated facility Elevated temperature PROC8b</b> No other specific measures identified.	
<b>Maintenance of small items Non-dedicated facility PROC8a</b> No other specific measures identified.	
<b>Remanufacture of reject articles PROC9</b> No other specific measures identified.	
<b>Storage PROC1</b> Store substance within a closed system.	
<b>Storage PROC2</b>	

## SAFETY DATA SHEET

Name of product : PHARMA 19

TOTAL S.p.A

Store substance within a closed system.
<b>Section 2.2 Control of environmental exposure</b>
<b>Product characteristics</b>
Predominantly hydrophobic. Substance is complex UVCB.
<b>Duration, frequency and amount</b>
Annual site tonnage (tonnes/year): 100 tons/yr Continuous release. Emission Days (days/year): 20 days/yr Fraction of EU tonnage used in region: 0.1 Fraction of Regional tonnage used Locally: 1 Maximum daily site tonnage (kg/d): 5000 kg / day Regional use tonnage (tonnes/year): 9300 tons/yr
<b>Environmental factors not influenced by risk management</b>
Local freshwater dilution factor [EF1] 10 Local marine water dilution factor: [EF2] 100
<b>Other given operational conditions affecting environmental exposure</b>
Release fraction to air from process (initial release prior to RMM): 0.0001 Release fraction to soil from process (initial release prior to RMM): 0.001 Release fraction to wastewater from process (initial release prior to RMM): 1e-006
<b>Technical conditions and measures at process level (source) to prevent release</b>
Common practices vary across sites thus conservative process release estimates used.
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>
If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of $\geq 0$ % No secondary wastewater treatment required. Risk from environmental exposure is driven by Treat air emissions to provide a typical removal (or abatement?) efficiency of: 70 % Treat onsite wastewater (prior to receiving water discharge) to provide the required removal (or abatement) efficiency of $\geq 0$ %
<b>Organisation measures to prevent/limit release from site</b>
Do not apply industrial sludge to natural soils. Prevent discharge of undissolved substance to or recover from wastewater. Sludge should be incinerated, contained or reclaimed.
<b>Conditions and measures related to municipal sewage treatment plant</b>
Assumed domestic sewage treatment plant effluent flow is:[STP5] 2000 m3/day Estimated substance removal from wastewater via domestic sewage treatment is: 96.6 % Not applicable as there is no release to wastewater. The maximum allowable site tonnage (MSafe) based on domestic sewage plant effluent release is: 180000 kg / day Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs is: 96.6 %
<b>Conditions and measures related to external treatment of waste for disposal</b>
External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3]
<b>Conditions and measures related to external recovery of waste</b>
External recovery and recycling of waste should comply with applicable local and/or national regulations [ERW1]
<b>Section 3 Exposure Estimation</b>
<b>3.1. Health</b>
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated [G21]
<b>3.2. Environment</b>
The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.[EE2]
<b>Section 4 Guidance to check compliance with the Exposure Scenario</b>
<b>4.1. Health</b>
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. [G32] Available hazard data do not support the need for a DNEL to be established for other health effects.[G36] Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. [G22] Risk Management Measures are based on qualitative risk characterisation. [G37]

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A**

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.[G23]

**4.2. Environment**

Further details on scaling and control technologies are provided in factsheet

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

<b>Calendering (including Banburys) Operation is carried out at elevated temperature (&gt; 20°C above ambient temperature). PROC6</b> No other specific measures identified.	
<b>Pressing uncured rubber blanks PROC14</b> No other specific measures identified.	
<b>Tyre build up Spraying PROC7</b> Minimise exposure by extracted full enclosure for the operation or equipment.	

## SAFETY DATA SHEET

Name of product : PHARMA 19

TOTAL S.p.A

**Vulcanisation Operation is carried out at elevated temperature (> 20°C above ambient temperature). PRO C6**  
Provide extract ventilation to material transfer points and other openings.

**Cooling cured articles Operation is carried out at elevated temperature (> 20°C above ambient temperature). PROC6**

Provide extract ventilation to points where emissions occur.

**Production of articles by dipping and pouring PROC13**

No other specific measures identified.

**Finishing operations PROC21**

No other specific measures identified.

**Laboratory activities PROC15**

No other specific measures identified.

**Equipment cleaning and maintenance PROC8a**

Drain down system prior to equipment break-in or maintenance.

**Storage PROC1**

Store substance within a closed system.

**Storage PROC2**

Store substance within a closed system.

**Section 2.2 Control of environmental exposure****Product characteristics**

Predominantly hydrophobic.

Substance is complex UVCB.

**Duration, frequency and amount**

Annual site tonnage (tonnes/year): 4300 tons/yr

Continuous release.

Emission Days (days/year): 100 days/yr

Fraction of EU tonnage used in region: 0.1

Fraction of Regional tonnage used Locally: 1

Maximum daily site tonnage (kg/d): 43000 kg / day

Regional use tonnage (tonnes/year): 4300 tons/yr

**Environmental factors not influenced by risk management**

Local freshwater dilution factor [EF1] 10

Local marine water dilution factor: [EF2] 100

**Other given operational conditions affecting environmental exposure**

Release fraction to air from process (initial release prior to RMM): 0.01

Release fraction to soil from process (initial release prior to RMM): 0.0001

Release fraction to wastewater from process (initial release prior to RMM): 1e-005

**Technical conditions and measures at process level (source) to prevent release**

Common practices vary across sites thus conservative process release estimates used.

**Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil**

If discharging to domestic sewage treatment plant, no onsite wastewater treatment required.

If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of  $\geq 0\%$

Risk from environmental exposure is driven by

Treat air emissions to provide a typical removal (or abatement?) efficiency of:  $0\%$

Treat onsite wastewater (prior to receiving water discharge) to provide the required removal (or abatement) efficiency of  $\geq 18.4\%$

**Organisation measures to prevent/limit release from site**

Do not apply industrial sludge to natural soils.

Prevent discharge of undissolved substance to or recover from wastewater.

Sludge should be incinerated, contained or reclaimed.

**Conditions and measures related to municipal sewage treatment plant**

Assumed domestic sewage treatment plant effluent flow is:[STP5] 2000 m3/day

Estimated substance removal from wastewater via domestic sewage treatment is:  $96.6\%$

Not applicable as there is no release to wastewater.

The maximum allowable site tonnage (MSafe) based on domestic sewage plant effluent release is: 1000000 kg / day

Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs is:  $96.6\%$

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A**

Conditions and measures related to external treatment of waste for disposal
External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3]
Conditions and measures related to external recovery of waste
External recovery and recycling of waste should comply with applicable local and/or national regulations [ERW1]
<b>Section 3 Exposure Estimation</b>
<b>3.1. Health</b>
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated [G21]
<b>3.2. Environment</b>
The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.[EE2]
<b>Section 4 Guidance to check compliance with the Exposure Scenario</b>
<b>4.1. Health</b>
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. [G32] Available hazard data do not support the need for a DNEL to be established for other health effects.[G36] Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. [G22] Risk Management Measures are based on qualitative risk characterisation. [G37] Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.[G23]
<b>4.2. Environment</b>
Further details on scaling and control technologies are provided in factsheet Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures. Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

<b>Conditions and measures related to external treatment of waste for disposal</b>
External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3]
<b>Conditions and measures related to external recovery of waste</b>
External recovery and recycling of waste should comply with applicable local and/or national regulations [ERW1]
<b>Section 3 Exposure Estimation</b>
<b>3.1. Health</b>
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated [G21]
<b>3.2. Environment</b>
The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.[EE2]
<b>Section 4 Guidance to check compliance with the Exposure Scenario</b>
<b>4.1. Health</b>
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. [G32] Available hazard data do not support the need for a DNEL to be established for other health effects.[G36] Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. [G22] Risk Management Measures are based on qualitative risk characterisation. [G37]

**SAFETY DATA SHEET****Name of product : PHARMA 19****TOTAL S.p.A**

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.[G23]

**4.2. Environment**

Further details on scaling and control technologies are provided in factsheet

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

## SAFETY DATA SHEET

Name of product : PHARMA 19

TOTAL S.p.A

Section 1 Exposure Scenario Title	
<b>Title:</b>	
Lubricants - Professional (Low Release)	
<b>Use Descriptor</b>	
Sector(s) of Use	SU22
Process Categories	PROC1, PROC10, PROC11, PROC13, PROC17, PROC18, PROC2, PROC20, PROC3, PROC4, PROC8a, PROC8b, PROC9
Environmental Release Categories	ERC9A, ERC9B
Specific Environmental Release Category	ESVOC 1.1.v1 ,ESVOC 8.6c.v1 ,ESVOC 9.6b.v1
<b>Processes, tasks, activities covered</b>	
Covers the use of formulated lubricants in closed and open systems including transfer operations, operation of engines and similar articles, reworking on reject articles, equipment maintenance and disposal of waste oil.	
Section 2 Operational conditions and risk management measures	
Section 2.1 Control of worker exposure	
<b>Product Characteristic</b>	
Liquid	
<b>Duration, frequency and amount</b>	
Covers daily exposures up to 8 hours (unless stated differently)[G2]	
Covers percentage substance in the product up to 100 %[G13 ]	
<b>Other given operational conditions affecting workers exposure</b>	
Assumes a good basic standard of occupational hygiene is implemented [G1]	
Operation is carried out at elevated temperature (>20 C above ambient temperature)[OC7]	
Contributing Scenarios/Specific Risk Management Measures and Operating Conditions (only required controls to demonstrate safe use listed)	
<b>General exposures (closed systems) PROC1</b> No other specific measures identified.	
<b>General exposures (closed systems) PROC2</b> No other specific measures identified.	
<b>General exposures (closed systems) PROC3</b> No other specific measures identified.	
<b>Operation of equipment containing engine oils and similar (closed systems) PROC20</b> No other specific measures identified.	
<b>General exposures (open systems) PROC4</b> No other specific measures identified.	
<b>Bulk transfers Dedicated facility PROC8b</b> No other specific measures identified.	
<b>Filling / preparation of equipment from drums or containers Dedicated facility PROC8b</b> No other specific measures identified.	
<b>Filling / preparation of equipment from drums or containers Non-dedicated facility PROC8a</b> Avoid carrying out activities involving exposure for more than 1 hour.	
<b>Operation and lubrication of high energy open equipment Indoor PROC17</b> Minimise exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings.	
<b>Operation and lubrication of high energy open equipment Indoor PROC18</b> Minimise exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings.	
<b>Operation and lubrication of high energy open equipment Outdoor. PROC17</b> Ensure operation is undertaken outdoors. Avoid carrying out operation for more than 4 hours. Limit the substance content in the mixture to 25 %.	
<b>Maintenance (of larger plant items) and machine set up Dedicated facility Elevated temperature PROC8b</b> Drain down system prior to equipment break-in or maintenance. Provide extract ventilation to emission points when contact with warm (> 50°C) lubricant is likely.	
<b>Maintenance of small items Non-dedicated facility Elevated temperature PROC8a</b> Drain or remove substance from equipment prior to break-in or maintenance. provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).	

**SAFETY DATA SHEET**  
**TOTAL S.p.A****Name of product : PHARMA 19**

<b>Engine lubricant service PROC9</b> No other specific measures identified.
<b>Manual Rolling, Brushing PROC10</b> No other specific measures identified.
<b>Spraying PROC11</b> Carry out in a vented booth or extracted enclosure. or Minimise exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings. Avoid carrying out activities involving exposure for more than 1 hour. OR Wear a respirator conforming to EN140 with Type A filter or better.
<b>Treatment by dipping and pouring PROC13</b> No other specific measures identified.
<b>Storage PROC1</b> Store substance within a closed system.
<b>Section 2.2 Control of environmental exposure</b>
<b>Product characteristics</b> Predominantly hydrophobic. Substance is complex UVCB.
<b>Duration, frequency and amount</b> Annual site tonnage (tonnes/year): 0.058 tons/yr Continuous release. Emission Days (days/year): 365 days/yr Fraction of EU tonnage used in region: 0.1 Fraction of Regional tonnage used Locally: 1 Maximum daily site tonnage (kg/d): 365 kg / day Regional use tonnage (tonnes/year): 120 tons/yr
<b>Environmental factors not influenced by risk management</b> Local freshwater dilution factor [EF1] 10 Local marine water dilution factor: [EF2] 100
<b>Other given operational conditions affecting environmental exposure</b> Release fraction to air from wide dispersive use (regional only): 0.01 Release fraction to soil from wide dispersive use (regional only): 0.01 Release fraction to wastewater from wide dispersive use: 0.01
<b>Technical conditions and measures at process level (source) to prevent release</b> Common practices vary across sites thus conservative process release estimates used.
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b> If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of $\geq 0$ % No secondary wastewater treatment required. Risk from environmental exposure is driven by Treat air emissions to provide a typical removal (or abatement?) efficiency of: Not Applicable Treat onsite wastewater (prior to receiving water discharge) to provide the required removal (or abatement) efficiency of $\geq 0$ %
<b>Organisation measures to prevent/limit release from site</b> Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.
<b>Conditions and measures related to municipal sewage treatment plant</b> Assumed domestic sewage treatment plant effluent flow is:[STP5] 2000 m3/day Estimated substance removal from wastewater via domestic sewage treatment is: 96.6 % Not applicable as there is no release to wastewater. The maximum allowable site tonnage (MSafe) based on domestic sewage plant effluent release is: 5.7 kg / day Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs is: 96.6 % Conditions and measures related to external treatment of waste for disposal External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3] Conditions and measures related to external recovery of waste

Name of product : PHARMA 19

TOTAL S.p.A

provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).

**Engine lubricant service PROC9**

No other specific measures identified.

**Manual Rolling, Brushing PROC10**

No other specific measures identified.

**Spraying PROC11**

Carry out in a vented booth or extracted enclosure.

or

Minimise exposure by partial enclosure of the operation or equipment and provide extract ventilation at openings.

Avoid carrying out activities involving exposure for more than 1 hour.

OR

Wear a respirator conforming to EN140 with Type A filter or better.

**Treatment by dipping and pouring PROC13**

No other specific measures identified.

**Storage PROC1**

Store substance within a closed system.

**Section 2.2 Control of environmental exposure****Product characteristics**

Predominantly hydrophobic.

Substance is complex UVCB.

**Duration, frequency and amount**

Annual site tonnage (tonnes/year): 0.058 tons/yr

Continuous release.

Emission Days (days/year): 365 days/yr

Fraction of EU tonnage used in region: 0.1

Fraction of Regional tonnage used Locally: 1

Maximum daily site tonnage (kg/d): 0.16 kg / day

Regional use tonnage (tonnes/year): 120 tons/yr

**Environmental factors not influenced by risk management**

Local freshwater dilution factor [EF1] 10

Local marine water dilution factor: [EF2] 100

**Other given operational conditions affecting environmental exposure**

Release fraction to air from wide dispersive use (regional only): 0.005

Release fraction to soil from wide dispersive use (regional only): 0.05

Release fraction to wastewater from wide dispersive use: 0.05

**Technical conditions and measures at process level (source) to prevent release**

Common practices vary across sites thus conservative process release estimates used.

**Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil**

If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of  $\geq 0$  %

No secondary wastewater treatment required.

Risk from environmental exposure is driven by

Treat air emissions to provide a typical removal (or abatement?) efficiency of: Not Applicable

Treat onsite wastewater (prior to receiving water discharge) to provide the required removal (or abatement) efficiency of  $\geq 0$  %

**Organisation measures to prevent/limit release from site**

Do not apply industrial sludge to natural soils.

Sludge should be incinerated, contained or reclaimed.

**Conditions and measures related to municipal sewage treatment plant**

Assumed domestic sewage treatment plant effluent flow is:[STP5] 2000 m3/day

Estimated substance removal from wastewater via domestic sewage treatment is: 96.6 %

Not applicable as there is no release to wastewater.

The maximum allowable site tonnage (MSafe) based on domestic sewage plant effluent release is: 5.6 kg / day

Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs is: 96.6 %

Conditions and measures related to external treatment of waste for disposal

External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3]

Conditions and measures related to external recovery of waste

Print date: 26 agosto 2015

Name of product : PHARMA 19

TOTAL S.p.A

<b>Other given operational conditions affecting environmental exposure</b>
Release fraction to air from wide dispersive use (regional only): 0.9 Release fraction to soil from wide dispersive use (regional only): 0.09 Release fraction to wastewater from wide dispersive use: 0.01
<b>Technical conditions and measures at process level (source) to prevent release</b>
Common practices vary across sites thus conservative process release estimates used.
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>
If discharging to domestic sewage treatment plant, provide the required onsite wastewater removal efficiency of $\geq 0$ % No secondary wastewater treatment required. Risk from environmental exposure is driven by Treat air emissions to provide a typical removal (or abatement?) efficiency of: Not Applicable Treat onsite wastewater (prior to receiving water discharge) to provide the required removal (or abatement) efficiency of $\geq 0$ %
<b>Organisation measures to prevent/limit release from site</b>
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.
<b>Conditions and measures related to municipal sewage treatment plant</b>
Assumed domestic sewage treatment plant effluent flow is:[STP5] 2000 m3/day Estimated substance removal from wastewater via domestic sewage treatment is: 96.6 % Not applicable as there is no release to wastewater. The maximum allowable site tonnage (MSafe) based on domestic sewage plant effluent release is: 35 kg / day Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs is: 96.6 %
<b>Conditions and measures related to external treatment of waste for disposal</b>
External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3]
<b>Conditions and measures related to external recovery of waste</b>
External recovery and recycling of waste should comply with applicable local and/or national regulations [ERW1]
<b>Section 3 Exposure Estimation</b>
<b>3.1. Health</b>
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated [G21]
<b>3.2. Environment</b>
The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.[EE2]
<b>Section 4 Guidance to check compliance with the Exposure Scenario</b>
<b>4.1. Health</b>
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. [G32] Available hazard data do not support the need for a DNEL to be established for other health effects.[G36] Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. [G22] Risk Management Measures are based on qualitative risk characterisation. [G37] Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.[G23]
<b>4.2. Environment</b>
Further details on scaling and control technologies are provided in factsheet Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures. Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

<b>4.1. Health</b>
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. [G32] Available hazard data do not support the need for a DNEL to be established for other health effects.[G36] Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. [G22] Risk Management Measures are based on qualitative risk characterisation. [G37] Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.[G23]
<b>4.2. Environment</b>
Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

## SAFETY DATA SHEET

Name of product : PHARMA 19

TOTAL S.p.A

<b>Section 1 Exposure Scenario Title</b>	
<b>Title:</b>	
Use in Cleaning Agents - Consumer	
<b>Use Descriptor</b>	
Sector(s) of Use	SU21
Process Categories	PROCNA
Environmental Release Categories	
Specific Environmental Release Category	ESVOC 1.1.v1
<b>Processes, tasks, activities covered</b>	
Covers general exposures to consumers arising from the use of household products sold as washing and cleaning products, aerosols, coatings, de-icers, lubricants and air care products.	
<b>Section 2 Operational conditions and risk management measures</b>	
<b>Section 2.1 Control of worker exposure</b>	
<b>Product Characteristic</b>	
Liquid	
<b>Duration, frequency and amount</b>	
Covers daily exposures up to 8 hours (unless stated differently)[G2]	
Covers percentage substance in the product up to 100 %[G13 ]	
<b>Other given operational conditions affecting workers exposure</b>	
Assumes a good basic standard of occupational hygiene is implemented [G1]	
No exposure assessment presented for human health. [G39]	
Operation is carried out at elevated temperature (>20 C above ambient temperature)[OC7]	
<b>Contributing Scenarios/Specific Risk Management Measures and Operating Conditions</b> (only required controls to demonstrate safe use listed)	
<b>Section 2.2 Control of environmental exposure</b>	
<b>Product characteristics</b>	
Predominantly hydrophobic.	
Substance is complex UVCB.	
<b>Duration, frequency and amount</b>	
Annual site tonnage (tonnes/year): 0.011 tons/yr	
Continuous release.	
Emission Days (days/year): 365 days/yr	
Fraction of EU tonnage used in region: 0.1	
Fraction of Regional tonnage used Locally: 0.0005	
Maximum daily site tonnage (kg/d): 0.031 kg / day	
Regional use tonnage (tonnes/year): 23 tons/yr	
<b>Environmental factors not influenced by risk management</b>	
Local freshwater dilution factor [EF1] 10	
Local marine water dilution factor: [EF2] 100	
<b>Other given operational conditions affecting environmental exposure</b>	
Release fraction to air from wide dispersive use (regional only): 0.95	
Release fraction to soil from wide dispersive use (regional only): 0.025	
Release fraction to wastewater from wide dispersive use: 0.025	
<b>Technical conditions and measures at process level (source) to prevent release</b>	
Not applicable	
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>	
Not applicable	
<b>Organisation measures to prevent/limit release from site</b>	
Not applicable	
<b>Conditions and measures related to municipal sewage treatment plant</b>	
Assumed domestic sewage treatment plant effluent flow is:[STP5] 2000 m3/day	
Estimated substance removal from wastewater via domestic sewage treatment is: 96.6 %	
Not applicable as there is no release to wastewater.	

## SAFETY DATA SHEET

Name of product : PHARMA 19

TOTAL S.p.A

The maximum allowable site tonnage (MSafe) based on domestic sewage plant effluent release is: 1.1 kg / day
Conditions and measures related to external treatment of waste for disposal
External treatment and disposal of waste should comply with applicable local and/or national regulations [ETW3]
Conditions and measures related to external recovery of waste
External recovery and recycling of waste should comply with applicable local and/or national regulations [ERW1]
<b>Section 3 Exposure Estimation</b>
<b>3.1. Health</b>
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated [G21]
<b>3.2. Environment</b>
The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.[EE2]
<b>Section 4 Guidance to check compliance with the Exposure Scenario</b>
<b>4.1. Health</b>
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. [G32] Available hazard data do not support the need for a DNEL to be established for other health effects.[G36] Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.
