

Spugna magica

Magic sponge - High-tech cleaning

Magic sponge: some useful information

Magic Sponge (Art. 3092263) is under every aspect a high-tech product, designed following a thorough research for a product that would be efficient, 100% natural, environmentally friendly and safeguarding the health. This kind of product does not involve the use of chemical detergents or, when their use is necessary, a very small quantity is

Art. 3092263

involved. Magic sponge is made of extremely fine acrylic material, able to absorb water. It penetrates into the micro-texture of very smooth surfaces such as steel, glass, ceramics, etc. Its mild abrasiveness allows not only an excellent cleaning-hygiene but it also performs a strong anti-bacterial action without damaging or scratching surfaces.

Recommendations for use

It is advisable to use Magic Sponge without detergents and, if their use is necessary, only very little detergent is added to the moist sponge. Soak the sponge, squeeze it and start rubbing. In case of use with detergent, it is advisable to wash thoroughly after use to eliminate chemical residue. If properly used and washed, Magic Sponge will maintain its cleaning-hygienic and antibacterial power for a long time.

“High-tech cleaner” - ecological, antibacterial and cost effective ally. Modern technology replaces chemical products.

We suggest using Magic Sponge jointly with microfibre cloths on tough dirt.

- First rub with a moist Magic Sponge, then wipe over with a microfibre cloth
“Eterno for Glass” (Art. 3092294) or “Eterno for all surfaces”. (Art. 3092293)

Products for the cleaning

and the hygiene without the use of chemical detergents

The search for the cleaning products that are 100% natural and environmentally friendly, i.e. not involving the use of chemical detergents, has led to the creation of high-tech products. Obviously all the operators belonging to the professional catering sector (bars, hotels, restaurants, pizzerias, etc.) are very keen to save on detergents, time and effort (product efficacy)

and, at the same time, be able to safeguard the environment and health. With this end in mind, three new technologies and four complementary products have been chosen. In total respect of the initial objective, this technology-product combination provides exceptional cleaning and hygienic performance.

1) Microfibre cloths

The extreme fineness of microfibre and its particular texture enable the fibres to penetrate the micro-unevenness of the smoothest surface.

Microfibre cloth Eterno for Glass

3092294

- This microfibre cloth is particularly suitable for the cleaning of glass, crystal, mirrors and glasses.
- The cleaning action is completely natural and without chemical detergents
- It is usually used dry (glasses, etc.) or slightly damp
- In case of tough dirt, the use of Spugna Magica – Magic Sponge (Art. 3092263) is recommended, to be used damp and followed by a microfibre cloth wiping action.
- If necessary, use a minimum quantity of glass detergent. In this case, we suggest washing thoroughly the cloth in water at 90° to eliminate the

Antibacterial microfibre cloth Eterno for all surfaces

3092293

This microfibre cloth is made of a particular texture-weaving that is extremely powerful on any surface and material used in the catering sector (kitchens, bars, pizzerias, etc.). Moreover, it has a very high antibacterial action (certified by specialized laboratories) for instance on:

- Staphylococcus aureus
- Escherichia coli

The microfibre cloth with antibacterial action Eterno for all surfaces has the same general characteristics in the version called Eterno for glass but with the addition of the strong antibacterial action.

The advantages of microfibre cloths

- Cleaning with no detergents
- 100% safeguarding the environment and health
- Saving costs, time and efforts
- If handled according to our recommendations, they will be practically indestructible
- In case of tough dirt, use a minimum amount of detergent and wash at 90° without softener

PLEASE NOTE:

In case of tough dirt, it is best to use Spugna Magica (Magic Sponge Art. 3092263).

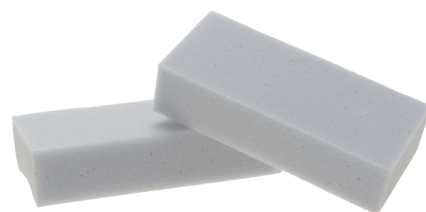

Products for the cleaning

and the hygiene without the use of chemical detergents

2) Spugna magica – Magic Sponge (Art. 3092263)

Spugna magica is another high-tech product for the cleaning and the hygiene in catering businesses and at home. Spugna Magica - Magic Sponge - is made of very fine acrylic material, that has been compacted using a particular procedure.

"High-tech cleaner" - ecological, antibacterial, low in price. Modern technology replaces chemical products.

If it is necessary to use a minimum quantity of detergent, we suggest immediate and thorough washing to remove all chemical residue after use.

Pro:

- Excellent cleaning efficiency and antibacterial action
- No use of detergents, except for rare cases
- Save money, time and physical efforts
- 100% safeguard of the environment and health.

This sponge is able to reach inside the micro-unevenness of materials and not only ensure both a perfect cleaning action and a very powerful antibacterial activity. Magic Sponge must be used slightly damp and it is the ideal complement to microfibre cloths.

- First rub with Magic Sponge slightly damp, then wipe over with microfibre cloths (Art. 3092293)

3) Magic stone (Art. 3092260)

This high-tech cleaning product is made of extremely fine glass powder that has been compacted at 580° C. Its abrasive action also leads to the actual wearing out of Magic Stone. With a gentle scrubbing, even the toughest encrustation is removed. Therefore, Magic Stone is the ideal product for the cleaning of: grids, pots, pans, cooking tops, burner rings, etc.

Pros:

- It also removes the toughest dirt/encrustations
- Saves money and time
- It needs no detergents
- It also cleans off smoke deposits and moulds on bricks, etc.

Dimensions:
100x70x45mm
100% Ecological

*The use of Magic Stone is recommended to remove encrustations. After use: rinse off, (washing off the glass powder) and then wipe the surface with the microfibre cloth "Eterno for all surfaces"

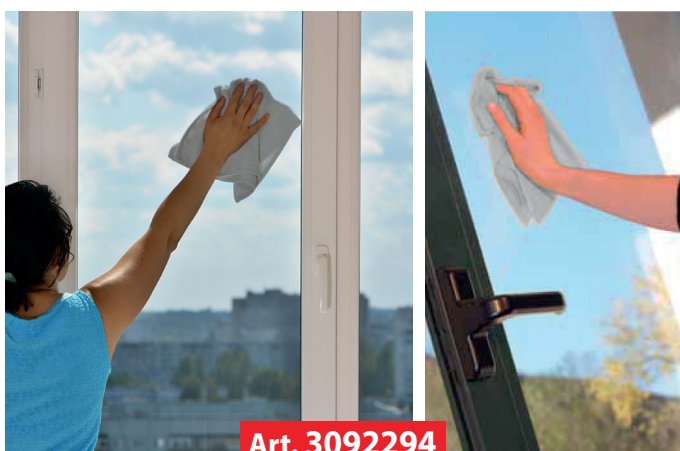

Products for the cleaning

and the hygiene without the use of chemical detergents

Our piece of advice for the cleaning-hygiene of catering businesses (bars, restaurants, pizzerias, hotels, etc.) which want to be innovational also in their safeguard of nature and health:

Microfibre cloth "Eterno for glass"

Antibacterial microfibre cloth "Eterno for all surfaces"

Spugna Magica – Magic Sponge

Magic Stone
