

# Coffee Clean

## Cleaning tabs for coffee machines

Also available in powder form for automatic machines, liquid and liquid for milk frother.

### Applications

Coffee Clean is a special product for professional cleaning of brewing units, filters and filter holders of coffee machines.

### Features and properties

Coffee Clean is a tablet detergent, odourless and easily soluble, which, thanks to its strong degreasing and emulsifying action on vegetable fats and its ability to develop active oxygen, is able to perfectly clean the parts making up the coffee machine assembly.

Coffee Clean washing solutions are perfectly rinseable without leaving any traces on the treated parts.

Chemical-physical data include: pH (1% solution) = 11.3

Apparent density: 0.96

### Use methods and doses

To clean filters, filter holders, etc.: Dissolve 1 tablet of Coffee Clean per litre of hot water. Soak the parts to be treated for 30 minutes or more; then rinse thoroughly.

To clean the unit: dose 1 tablet of Coffee Clean into the blind filter and operate as for a normal coffee brew. Open and close the brew at approximately 10-second intervals, repeat the operation 4-5 times, then rinse thoroughly.

The product is IRRITANT; handle with caution; for further information see safety data sheet.

### Packages

1 g tablets in tins of 100 tablets in cartons of 48 pieces.

2.5 g tablets in tins of 60 tablets in cartons of 24 pieces.
