

Coffee Clean

Detergent for the cleaning of coffee machines

Also available in tablets for vending machines, liquid and liquid for milk frothers.

Application

Coffee Clean is a special detergent for the professional cleaning of coffee machines brewing groups, filters and filter holders.

Properties

Coffee Clean is a white, odourless and easily soluble powder, which, thanks to a strong degreasing and emulsifying action of vegetable fats and the ability to develop active oxygen, is able to clean perfectly the components of the group of coffee machines.

Coffee Clean washing solutions are perfectly rinsed-off and leave no trace on treated parts. Among the physical-chemical data: pH (solution 1%) = 11.3, apparent volume mass: 0.96.

Instructions For Use

For the cleaning of filters, filter holders, etc.: dissolve about 1 tablespoon of Coffee Clean per 1 liter of hot water. Soak the parts requiring treatment for 30 minutes or more; then rinse thoroughly.

Group cleaning: measure out 1 teaspoon of Coffee Clean in the blind filter and operate as for standard coffee brewing. Open and close the delivery at intervals of about 10 seconds. Repeat this procedure 4-5 times, then rinse thoroughly.

This product is an IRRITANT; handle with care. For further information, refer to the Material Safety Data Sheet.

Packaging

20 g sachets in 15 sachets cases; boxes contain 24 cases.
