---

### *STABILITY AND REACTIVITY*

---

The product is stable under recommended conditions of storage and use.

---

### *TOXICOLOGICAL INFORMATION*

---

Continuous exposure for professional reasons to detergents (soap, shampoo, liquid detergents) can lead to depletion of the hydrolipidic mantle and the stratum corneum, which are the natural skin barrier. Impoverishment of this barrier may cause lesions to skin, which is more exposed to external agents. Under such conditions, the handling of other products normally used during professional activity, without due consideration (eg specific gloves or DPIs), may be the cause of intolerance that may in the long run lead to more serious forms.

---

### *DISPOSAL INFORMATION*

---

For the disposal of cosmetic products refer to local law (for Europe Directives 75/442 / EEC and 91/689 / EEC and Legislative Decree 152 of 03/04/2006 for Italy).  
For disposal purposes, empty containers of cosmetics may be delivered to the municipal waste collection service without any other obligation

---

### *TRANSPORT INFORMATION*

---

The transport of the product must be carried out by suitable vehicles to the nature of flammable cosmetics, in LTD Quantity.

---

### *REGULATORY INFORMATION*

---

Finished cosmetic products intended for the end user and governed by Regulation (EC) No 1223/2009 are explicitly excluded from the scope of Regulation 1272/2008 (CLP).  
Finished cosmetic products should not be classified and labeled according to CLP.  
In addition, Regulation 1907/2006 (REACH) excludes finished cosmetic products from the application of the provisions of Title IV of REACH.  
Pursuant to Directive 76/768 / EEC, the final consumer is, indifferently, the final consumer or the professional user, as there are no distinctions between these two figures.
