

Microfibre

The new high-tech challenge for cleaning, hygiene and sanitizing of horeca appliances and private users

➤ All the advantages of microfibre cloths

Microfibre is made by the micro extrusion of materials such as acrylic, nylon, polyester or rayon. **It is twice as thin as silk and three times as fine as cotton.** Its size and the characteristics of the material it is made of make it unbeatable in cleaning activities. It shows a capability of absorbing and capturing dirt, which traditional cotton cloths do not have.

Microfibre cloth

Cotton cloth

➤ The cleaning effect is extraordinary

The high-tech microfibre cloths have nothing in common with traditional cloths sold in supermarkets. They are used with very little or no use of chemical products and do not require scrubbing. A soft wiping on the surface is enough to make everything clean again.

➤ Steel contamination, before and after cloth use

Staphylococcus aureus

BEFORE	11.000	16.000	21.200	22.000	26.000
AFTER	0	0	0	<1	0

Escherichia coli

BEFORE	40	700	950	1.300	1.450
AFTER	0	0	0	0	0

Staphylococcus aureus = 500/cm² • Escherichia coli = 100/cm²

➤ Antibacterial action

With microfibre cloths, besides quick and easy cleaning, sanitizing of surfaces is always ensured.

It seems impossible that a microfibre cloth is able to destroy most of bacteria growing in kitchens or in other professional and domestic environments.

The antibacterial action is provided by the thinness of microfibre, which can penetrate the smallest unevenness in material and eliminate bacteria.

The antibacterial action has been confirmed by specialized labs, acknowledged by the Ministry of Health. Laboratory test result:

- tests performed in compliance with EC regulations;
- comparison value – figures acknowledged in the above mentioned environments.

➤ Maintain the antibacterial action in time

In order to maintain the antibacterial action in time, after 10-15 uses, the cloth will have to be washed in 90° water with **no detergent**.

➤ Nuove tecnologie per pulizia e igiene

Perfetta pulizia-igiene e risparmi tempo e fatica

PANNO MICROFIBRA

- Tutte le superfici
- Antibatterico
- Pulisce senza detersivi
- 400x400mm

PANNO MICROFIBRA

- Speciale vetro/cristallo
- Antibatterico
- Pulisce senza detersivi
- 400x400mm

SPUGNA MAGICA

- 125x55x30mm
- Tutte le superfici
- Ecologica
- Elimina batteri 99%

KIT PULIZIA "EASYSOON SET"

Il kit è composto da:

- 1 Panno microfibra Eterno Silver
- 1 Panno microfibra Eterno Vetri
- 1 Spugna Magica
- 1 Crema per acciaio

MAGIC STONE

- 100x70x45mm
- Abrasivo per incrostazioni
- Per calcare, griglie, piani cottura, teglie, padelle, ecc.
- 100% vetro 580°C DIN 53420 UNI 53215

Ricambi per cucine professionali, macchine caffè, refrigerazione commerciale, attrezzature bar e vending
