

ECO GRANULATE ABSORBER CLEANER 014-6Kg

Environmentally friendly

LF Code Nr.
3092307

- **INEXPENSIVE**
absorbs the 100% of its weight
- **ECOLOGICAL**
non-toxic, odourless and eco-friendly
- **UNRIVALLED**
against paint and varnish stains

Caution: The blend is classified as not dangerous by CE 1272/2008 safety regulations. Do not inhale the dust which is produced when the product reacts to dirt

Completely removes streaks and dried stains, keeping every kind of surface clean and non-slippery. Absorbs and cleans oil, grease, hydrocarbon, paint, varnish, silicone, resin and organic stains.

The **Eco Granulate Absorber Cleaner 014** has a high absorption capability and the secret to this lies in the knobby structure of every single granule. Each is capable of encapsulating and neutralizes all kinds of spilt liquid, in particular oily, creamy, sticky and dried paint stains.

With just a light brush every streak and smear will be removed, leaving a smudge-free, non-slippery clean surface. The granulate residue does not smear when directly touched and is easy to remove.

The **Eco Granulate Absorber Cleaner 014** completely replaces every type of paint thinner and cleaning solvent, some of which are a risk factor as they are highly flammable and toxic. The usage of sawdust, once heavily used to absorb accidental solvent spillage, is now prohibited by law as it is flammable and subject to biological risk.

Eco Granulate Absorber Cleaner 014 is the ideal choice for accidental spillage and leaks as it leaves no residue or smears.

- Encapsulates dropped materials and leaves surfaces non-slippery
- Non-flammable product, helps to reduce fire risk
- Easily replaces all non-compliant products
- Environmentally friendly as it is non-toxic
- UE-Reach standards compliant and Made in Italy

Eco Granulate Absorber Cleaner 014 is unrivalled for security at work and in various working sectors.

- **CONSTRUCTION INDUSTRY AND D.I.Y. HOME IMPROVEMENTS** - for cleaning leaks and streaks of paint, plaster, silicone and resin
- **FOOD INDUSTRY** - absorbs organic liquids. Suitable for restaurants, olive-oil mills, wine cellars and food production and other general food stocking facilities
- **ROAD SAFETY** - to quickly absorb hydrocarbon and oil
- **MECHANIC'S WORKSHOP AND INDUSTRIES** - to absorb oil and grease leaked from motors and plants
